WEDNESDAY, AUGUST 12, 1885.

ASSOCIATED PRESS TELEGRAMS

HAYAS AGENT

New York, 9th.

Yesterday General Grant's funeral

took place. An immense concourse

of people assisted and made the funeral

a magnificent spontaneous manifestation.

The speeches delivered on the occasion

were enthusiastic.

Berlin, 9th.

Telegraphic advices have been

received announcing the arrival of the

German squadron at Zanzibar.

Paris, 9th.

Yesterday the British Commissioner,

Sir Henry Drummond Wolff, left London

for Constantinople. His mission

is to make arrangements with the

Sultan for the proposed reorganization

of the Egyptian finances.

London, 9th.

The House of Commons has passed

the Bill for the protection of girls under

age.

Parliament will adjourn on the 13th

inst.

Paris, 10th.

No alarming news has been received

from Marseilles. The sanitary state

of the other departments is perfect.

PRESS TELEGRAMS.

Washington, 8th.—The President of

the Republic and his Minister have left

for New York, to assist at Gen. Grant's

funeral.

New York, 8th.—The funeral services

for General Grant took place yesterday

at the Metropolitan Church. Thousands

of persons, of all ages and classes, at-

tended the funeral. The troops of the

line also form part of the cortege.

Madrid, 8th.—The Official Bulletin

yesterday showed 4689 fresh cases and

1662 deaths.

Marseilles, 8th.—The situation is im-

proving. Emigration continues to in-

crease. The Italian corvette

Flavio Gioja, under the command of

Capt. Cobanelli, watching the proceed-

ings taken against the Government of

Catca, for having confiscated all the

properties of an Italian subject, accus-

ed of rebellion.

The National Government of Colum-

bia has taken the affair in hand, and

in spite of the evident hostility of the

Cauca Government, the prisoner will

probably be released and his prop-

London 8th.—It is stated that Sir Charles Dillio will be publicly accused by Mr. Donald Crawford of having seduced a girl under age.

Lima 10th.—Caceres is at present in Tarma with the Zepita battalion, 4 pieces of artillery and 80 horse soldiers under the command of Colonel Urquiza.

Rio de Janeiro 10th.—Minister Moreno returns to Buenos Ayres in the Umberto.

Rosario 11th.—The arrival is announced of Dr. Irigoyen and several of his friends. It is stated that he has not succeeded in settling the dispute between Galvez and Iriondo respecting the Governorship.

Montevideo 11th.—Government has telegraphed to the Oriental Council in Geneva to obtain details with regard to the suspicious cases of cholera in that city.

The cable is being repaired between Bahia and Pernambuco.

Nothing important to note in political circles.

FROM OUR BROTHER-EDITOR.

London July 10th.

The success of the new Canadian loan is much commending on, because it was negotiated last year, in 34 per cent. As the debt is now 42 millions sterling, by which you count everything by heads are beginning to complain that £10 per inhabitant is too much for a country which is 8 months of the year under snow. But it must be borne in mind that the revenue of the Dominion shows great elasticity.

In 1873 it was \$4,440,000 and in 1883 it rose to \$7,670,000, being an increase of \$3,230,000, which would pay interest on a debt of \$50 millions or double the actual amount. The loan of last week was subscribed for up to 12 millions, only 4 millions being asked. Perhaps the best proof how little taxation weighs upon the Canadians is the fact that there is not a pauper in the Dominion (at least visible to the naked eye), and that no European nation consumes as much meat, butter and cheese per inhabitant.

The Australian colonies have been borrowing largely since January 1883, when the total debt barely reached 100 millions sterling. At that time I published a letter in the Times on Australian debts, in which I hazarded the theory that Australia must go on borrowing five or ten millions yearly to suit her material progress, and I added "the Australian debts are certain to reach 150 millions by the year 1890."

This provoked the indignation of Sir Dillon Bell, who declared the colonies were then bent on reducing their debts and would never exceed the sum of 100 millions. I find by the Economist of April that the actual debts of Australia in January 1885 were 123 millions, besides laws passed for 35 millions more to be raised before the close of 1885.

My prediction will have been verified. The new loans in 1884 for Australia amounted to 103 millions in 4 per cent and 54 millions in 3 per cent. Of course the facility for borrowing is the most dangerous gift that an individual or a nation can possess; but there is no reason to be nervous about Australia, where the net revenue of the state railways exceed 23 millions sterling per annum on half the annual debt charge.

The Budget was presented last night and will probably meet with serious opposition. Sir Michael Beach makes few alterations on the Children's Budget, and adopts the 8 pence income tax; this is really a heavy impost and the only one much felt in this country, yet Mr Gladstone had an income-tax of 10 pence during the Crimean war, and the people approved the year's taxation cost of making the year's expenditure, which would exclude the necessity of public debt. In my opinion all extraordinary expenditure, whether for war, purchase of telegraphs, or construction of dockyards, etc., should be saddled as a mortgage on the public estate. It seems very absurd that this generation should hand down to the next property worth 9,000 millions sterling, in the shape of railways, docks, loans, houses, etc., and yet hesitate to leave any charge upon the State. An ounce of experience is worth a ton of theory, and we see that no nation can get on without public debt. The U. States are madly paying off their debt by doubling taxation this generation, and the country is consequently passing through a tremendous crisis: some of their industrial cities are "to be let" and 300,000 operatives are out of employment; their shipping has disappeared from the seas. Reckless debt for a nation means inevitable bankruptcy, prudent borrowing is the high road to prosperity.

Sir Michael Beach, being unable to meet the deficit which Mr Gladstone vainly hoped to cover by beer-duties, proposes to issue Exchequer Bills for 4 millions, which will probably be converted next year into term annuities and added to the National Debt.

The news published in B. Ayres, on the 2nd ult. of Dr. Pellegrini's having obtained 24 millions sterling in London, had not transpired here; at least, I saw nothing about it in the papers.

The political world is quiet. Lord Wolsey is expected to arrive from Egypt next Tuesday. Telegrams from Cairo announce that on Sept. 1st the Government of Egypt will stop paying everybody, as it will then be hopelessly bankrupt.

M. G. M.

"Did any man ever yet make anything by opposing a woman's will?" "Yes, I have made a good deal by that sort of thing," answered his brother Richard. "But, Dick," rejoined the other, "you're a lawyer, and the woman whose will you opposed was always dead."

CATTLE FARMING IN THE PLATE.

The South American Journal, in its last number published a long and interesting chapter on River Plate cattle farming. The paper may be read with interest out here and we publish the following extracts:—

"The sales of oxen, it is considered should be about ten per cent. of the total head of cattle, and the sales of cows (say) about five per cent. This is supposed the *estancia* is properly stocked. One of the most profitable operations seems to be the *Invernada* principle of buying cattle in the winter, after the *saladeros* have ceased working, and fattening them up till spring, and then selling them. For fattening purposes, it is said by some authorities that 1,000 to 1,200, or, according to another, 1,500 per *sertão*, is as much as the land ought to carry; and another, who thinks that for breeding purposes half-sheep and half-cattle is best, says that by no means should fattening cattle be placed on the same land as sheep, if they are wanted to come forward quickly. The oxen may, on an average, be bought at \$10 out of season and sold for \$15 in season, or at Montevideo \$16 to \$18 in ordinary seasons. This year the prices are abnormally high. The prices given by Mr. Ocker (Clibing Extract of Meat Company), Fray Bentos, were, up to 1st January, \$17 for four years oxen, and \$12 for cows three years and over. After that it was announced as \$16 for oxen till March, but these are higher prices than have hitherto been given at Fray Bentos. On the other hand, owing to the long drought last year, cattle were purchasable at very low prices, and passes were cited to the effect that cattle bought at \$6 were sold at \$16 a few months after. This, however, was exceptional. One great advantage of the *Invernada* system is that for several months of the year the land can be allowed to rest, and that at the period when the grass seed is ripening. But in order to take full advantage of it, the *estancia* should be well wired and divided into *pantanos*, to put out the cattle in order to graze, and to keep them so, to produce the best impression upon the *tropeiros*. The question of breeding is also attracting much attention. Hitherto short-horn Durhams have been preferred, but at present Herefords are coming into decided favour, as being rather more hardy than Durhams. At Fray Bentos, where they kill from 100,000 to 150,000 per year, the *desfais*, for the most part, make into *Libio's*. Extract of Beef, and the rest is made into *charque* or jerked beef, or is tinned for Europe. Tinning beef meat seems to be on the increase, especially ox tongues, which business is largely carried on at Paysandú and Fray Bentos. The sort of meat used to make *charque* or jerked beef, which is meat cut into very large thin slices and dried in the sun, and is then consumed in *Libio's* and *charque*. In the former they require it made from carne gorda, or the prime beef, but in *Libio's* they appear to be slightly less exacting, and carne buena is used. From inquiries made there, and from conversations I have had with men conversant with cattle-farming in Canada and the States I do not see any great chance of the Plate successfully competing with them in the export of fresh meat—either dead or alive—at present. The hide, tallow, horns, and bones must therefore continue to be the chief exports to Europe, with a small amount of tinned meat. The wiring-in of the country will cause great changes in cattle-farming, inclusive of much more economy in labour, and it may be hoped that a freer communication with other cattle-farming centres of the world will introduce great improvements. The introduction of the cattle 'race,' which I believe, to Australia, will, if it becomes general, do away with much of the rough treatment of the *vaqueos*, which one of the most experienced and advanced of the *estancieros* said he discouraged as much as possible.

The acting manager of a cattle *estancia* ought to be in vigorous health, and an indefatigable rider, so as to have his eye on the *vaqueos*, and to know what saleable stock he has on hand, and should not trust to his *capataz* or *vaqueador*, or by putting out to it of cattle from the other *vaqueos*, and on the opposite side those withdrawn, either by death, sale, or otherwise; and at the end of the year, when counted, the right number closes the account, with an entry correcting the estimated by the actual number. This varies naturally, as between *vaqueos* and *vaqueos* especially when there are too numerous and too near, as the latter is probably an uneducated native—a very good servant, perhaps, but no more, and requiring a firm though just master. He ought to keep himself on guard of what is going on in the *estancia* and in the markets. Cattle books are kept on most *estancias*, in which each *vaqueador* has his folio. Under the number of the last annual account is placed any additions the *vaqueador* either by calves marked, or by putting out to it of cattle from the other *vaqueos*, and on the opposite side those withdrawn, either by death, sale, or otherwise; and at the end of the year, when counted, the right number closes the account, with an entry correcting the estimated by the actual number. This varies naturally, as between *vaqueos* and *vaqueos* especially when there are too numerous and too near, as the latter is probably an uneducated native—a very good servant, perhaps, but no more, and requiring a firm though just master. He ought to keep himself on guard of what is going on in the *estancia* and in the markets. Cattle books are kept on most *estancias*, in which each *vaqueador* has his folio. # NOTICE.

We beg to advise the public and our clients in particular, that having terminated the liquidation of the business, two of the partners having retired, we have this day reopened our several places of business, viz:

Calle de Moreno 88 to 96

Calle de Mexico 2 to 6

Calle Pedro de Mendoza 254 to 265

Boca del Riachuelo

In addition, we would make known to all whom it may concern, that the sole representatives of the old firm in Great Britain, are Messrs. Alexander Doughty & Co. of Liverpool, who alone hold our authority to act upon our behalf.

In making known to the public that we have reopened our various houses of business, we have much pleasure in stating that any orders with which we may be honoured will have all the attention and care that will be filled with the least possible delay.

# R. HORNSBY & SONS LD.

HERCULES MOWER AND FERN CUTTER

Our machine has been specially designed for the Colonies and other new countries, for cutting strong thistles, fern and light scrub on rough land, and has been most successful in Australia and South America. It has very high wheels and is of great strength combined with lightness in draught.

The cutting apparatus consists of 2 sets of knives, one set fixed to the Bar in place of the Fingers, and the other driven by the Crank plate and connecting Rod in the usual way.

The numerous verdicts of all who have worked this machine is that it is the "Most useful and economical implement on the estancia."

# Reuter's Life Syrup No. 21

A positive and radical cure for every form of bad blood, foul humors, scrofulous sores, Ulcers and Tumors, guaranteed to cure and eradicate every vestige of Syphilis, primary, secondary and tertiary. It is the only cure known for Lepra, or Pectus carnosus, lumps, scaly and scabrous eruptions, mercurial poisoning and pimple affections. It is also a sure and certain remedy for all diseases of the Kidneys, such as Bright's Disease, Gravel, Hematuria, fatty degeneration, chronic inflammation, etc.

The best of all stimulants and correctors of the Liver, promptly removing torpidity, hardening, and enlargement, relieving the bile, causing it to flow freely into the bowels, thereby preventing and removing constipation, dyspepsia and indigestion, thus removing the cause of headaches, dizziness, nausea, palpitations, hysteria and fainting. A fair trial of the Life Syrup No. 21, is all that is needed. We give every guarantee.

A COMPLETE CURE!

Reuter's Healing Soap

Bath, Toilet, Nursery, and all Diseases of every kind and at every stage.
